Eliminate paper. Automate manufacturing.

Start tracking your production and operations faster, easier and more accurately with QT9 ERP. User-friendly ERP job management software.

ERP and MRP software made easy.

Integrate your organization's processes by connecting people, products and data in real-time.

QT9™ ERP Modules

Customer Management
Manage all aspects of your customers in one interface. Assign multiple ship-to addresses, assign products, create contacts, manage their products, etc. This interface also shows you all of the activity of each customer.

Supplier Management
Manage all of your suppliers and their contacts in one interface. View all purchases made from this supplier, and what items you buy from them. Assign products to your supplier and keep track of their pricing.

BOM (Bill of Materials) Management
Keep track of your manufactured products Bill of Materials by product revision! You can create unlimited revisions of your products and have a full BOM for each revision. Keep track of routings, raw materials needed, set up times, estimated labor costs, attach files, attach prints and specs, and much more!

Purchasing
Create purchase orders in QT9 ERP and receive multiple times off of them directly into inventory. Keep track of the rejected material and red tag it through QT9 ERP. Attach files to the Purchase Order to stay more organized. Email your Purchase Orders right out of QT9 ERP to your suppliers.

Sales Orders
Create sales orders in QT9 ERP and process them into jobs for production. Keep track of your customer's POs by attaching them to the sales order itself! Keep track of unprocessed orders, open orders for shipping, and closed orders in our easy to use grids. Email your sales order confirmations to you customers right through QT9 ERP.

Returned Goods Authorization
Track all product returns in our RGA module. Create credits as well as what inventory was returned. Send an RGA notice to your customers and create nonconforming product or corrective actions in QT9 QMS from the RGA module.

Shop Floor Manager
Let your shop floor employees edit job data on the floor through our Shop Floor Manager. Using barcodes for both your employees and job travelers, your shop floor employees can time in and time out on job routings tracking their labor, assign material inventory to jobs, complete routings, enter machine counts, and track scrap.

Quotes
QT9 ERP gives you the ability to create an unlimited number of quotes/estimates. Link straight to a BOM revision, enter in margins, estimate labor, and different cost structures. Quote in standard form and upgrade it to a sales order or quote out a pricing schedule and upgrade it to customer pricing with a full audit trail!

Inventory Control
QT9 ERP inventory is a transaction-based inventory that keeps track of your inventory in real time. All transactions are kept via transaction dates so that you can look at your inventory in history. *Every inventory transaction has an audit trail to track back to the business function that created it.* Materials used in jobs are removed from raw material inventory, completed jobs created finished goods inventory, shipping relieves finished goods inventory, and receiving creates inventory.

Shipping
Shipping doesn't get any easier that QT9 ERP shipping! Create professional Bill of Ladings, packing lists, and shipping labels (with barcodes) at the click of a button. Work off of our open orders queue to know exactly what is up for shipping when. Also close out your shipping records 4 different ways to handle any type of billing.

Invoicing
QT9 ERP allows you to bill your customers any way you need to! Color coded alerts for pricing changes from the invoice to changes in customer pricing help eliminate missed revenue from billing mistakes. Our invoices can also port directly over to QuickBooks or Peachtree/Sage 50 for your financial needs.

Job Scheduling & Management
QT9 ERP comes with a very feature rich production section. Track your jobs and manage your BOM with cost information as well as data grid and Gantt chart style job scheduling. Track your routings and piece counts/labor accordingly giving you a tight unit cost to your finished goods and solid profitability reporting. QT9 ERP also gives you quick looks for material availability, job costing, machine availability, etc.

MRP Planning
Break down your scheduled jobs and future sales orders into the raw materials and quantities of them that you need to meet demand. Automatically create purchase orders from the MRP Planning form to further automate the process.

Accounting
Track a formal general ledger with full journal entries. QT9 ERP accounting also easily keeps track of your Accounts Receivable & Account Payable integrated into Bills & Purchase Orders as well as Sales Invoices and Cash Receipts. Everything you need for keep your books of your organization integrated in to the ERP functions of QT9 ERP. Also includes banking (checking and credit cards) as well as bank reconciliation.

Vendor Returns
Easily set up the shipping paperwork to return materials back your vendors for credit. This will create necessary inventory transactions as we well as set up the ability to track debit memos for accounting (if you are using QT9 ERP Accounting).

Physical Inventory
QT9 ERP's Physical Inventory Count Module allows you to track unlimited physical counts of manufactured items, purchased items, or both. Track lots and inventory locations in your physical count and compare the counts to your existing perpetual inventory in the system.

QT9™ ERP Features

Email Alerting
Configure email alerts for inventory level of both your raw materials and your finished goods.

Outlook Integration
Create Outlook email messages with automatic PDF attachments from multiple modules within QT9™ ERP such as invoicing, shipping, purchasing, etc.

File Attachments Everywhere
Attach ANY type of file to virtually any record in QT9™ ERP. This allows you to stay organized and have ALL of the necessary data in one place accessible at the click of a button.

Manufactured Item Inventory Drill Down
Drill down to see your product's current inventory, your BOM and their inventory levels, 3-6-9 month shipping averages, open orders, and shipping history all in one printable form.

Raw Material Inventory Drill Down
Drill down to see your raw material's current inventory, what finished goods it is used in, how much is on order, what is needed to fulfill jobs, what its 3-6-9 month usage was, open purchase orders, etc. all in one printable form.

User-Friendly Design
QT9™ ERP is based on a tab system. Meaning each major dashboard form is opened as a tab within the main software window, giving you the ability to quickly navigate back and forth between forms without cluttering your windows taskbar. You also have the ability to open multiple instances of the same forms with different records for comparison.

Customizable Grids
QT9™ ERP is packed with customizable grids that give you the ability to sort, group, get averages & sums, and export to excel. This makes virtually every form in the system a user defined report!

Integration with QuickBooks Accounting
Keep your current accounting software as is and let QT9™ ERP manage the day to day business. QT9™ ERP can integrate both the sales invoices and supplier Invoices (payables) directly into both QuickBooks accounting software.

Link to QT9™ Quality Management Software
If you are looking for quality management software, QT9™ ERP will directly interface with our QT9™ Quality Management Software thus giving you a single software source both your manufacturing management and your quality management needs. Create Nonconforming products, corrective actions, and customer feedback records from QT9 ERP directly to QT9 QMS. Also view your quality actions by customer, item, job, etc. in QT9 ERP.

Supplier On-Time Delivery Dashboard
See how well your suppliers are performing in our "one click" supplier on time delivery dashboard equipped with data and a pie chart.

Minimum Stock Dashboard
It is one thing to get email alerted as items need to be purchased or manufactured, it is another to see it in a sortable, filterable grid that exports to Excel

Custom Report/Print Out Generation
QT9 ERP comes with a free custom report writer that not only lets you create custom reports off of your QT9 ERP data, but also build your own print outs for the various sections of QT9 ERP such as the Job Traveler, Shipping Labels, Invoices, Purchase Orders, etc.

Comprehensive Help Content
QT9 ERP comes with not only a help file that gives you definition of each module and the general flow of the module including field definitions, but QT9 ERP also has a "How To" manual. The How To manual will walk you through certain tasks in QT9 ERP with complete screenshots and step by step instructions.
